Dog tracking app

Xiaoyu Ma

xiaoyuma0214@gmail.com

Statement of Intent

The purpose of this app is to track dogs in my neighborhood. I want to sort dogs by how they look in terms of color and size. They can be seen in different locations every day, for example, dog parks, sidewalks, and lawns.

What I can do with the app is when I see a dog, I create a dog profile that includes a nickname and other information about the dog and marks the location on a map. Every time I see a new dog, I can track the dog on the app by adding a new location, and every day I see the same dog again, I mark the new location under the dog profile I have created.

Why I want to make this application is because I live in a neighborhood where we see all kinds of dogs every day. They are all different not only because of their breeds, but also I found interest that observing dogs with different looks which tells their personalities.

Color and Font

Primary color

Secondary color

Header - New Order - Semibold - 25 px

Body - Proxima Nova - Regular - 20 px

Sign in

A wireframe for a sign-in screen. It features a large 'Logo' placeholder at the top. Below it is a rounded rectangle containing two input fields labeled 'Email' and 'Password'. To the right of the 'Password' field is a link labeled 'Forgot'. At the bottom of the rounded rectangle is a button.

Dog list

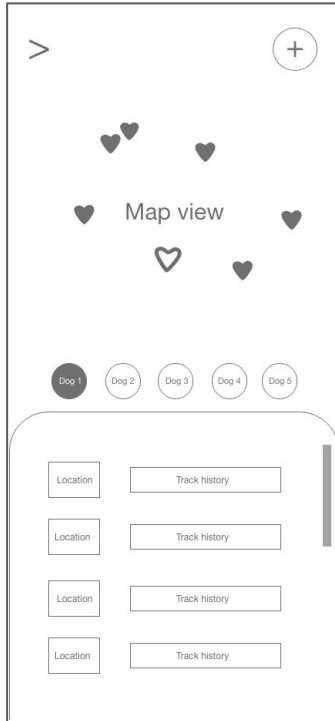

A wireframe for a dog list screen. At the top right is a circular button with a '+' icon. Below it is a header section with a circular 'User' icon and the text 'Hi, User'. The main content is a rounded rectangle containing a list of five items, each with a circular 'Dog' icon and a 'Last seen' label. At the bottom is a dark grey navigation bar with the text 'Home Map User', where 'User' is underlined.

User profile

A wireframe for a user profile screen. At the top right is a circular button with a '+' icon. Below it is a header section with a circular 'User' icon and a 'Profile' label. To the right of the 'Profile' label is an 'Edit' link. The main content consists of two rounded rectangles, one labeled 'Profile' and one labeled 'Dog preference'. At the bottom is a dark grey navigation bar with the text 'Home Map User', where 'User' is underlined.
